Experience

Developer, team-lead - chinese horoscope mobile application   **Dec 2023 - Present**

Designed and developed a cross-platform mobile application for iOS and Android using the React Native Expo framework.
 • Implemented user registration and authentication features integrated with Firebase Authentication for secure and seamless onboarding.
 • Built a robust backend system on Firebase, leveraging Firestore for real-time database management.
 • Integrated analytics tools (Amplitude) to monitor user behavior, track engagement metrics, and optimize app performance.
 • Published the app successfully on Google Play Store and Apple App Store, adhering to platform-specific guidelines and standards

Full-stack Web Developer - multilanguage website networks, online stores   **Jan 2016 - Present**

Web development with WordPress, Opencart and other CMS platforms.
 • Successfully launched websites from scratch, ranging from landing pages to e-commerce stores, handling the entire development cycle: from design and programming to hosting setup and server configuration.
 • Worked on client projects, maintaining long-term partnerships with agencies and small businesses from the US and Europe. Strong problem-solving abilities, team management skills, and experience communicating with clients across all project stages.
 • Experienced in search engine optimization (SEO) and monetization of personal projects, with proven success in achieving top rankings in Google search results.
 • Led and managed cross-functional teams, overseeing project planning, task delegation, and ensuring timely delivery of high-quality results.
 • Skilled in front-end and back-end development, server management, web-scraping using custom Python software.
 • Additional expertise in UI/UX design and interface development, ensuring user-friendly and visually appealing products.

Projects

Websites and online stores with Wordpress and Opencart CMS
Portfolio Link
